INTRODUCTION

Businesses are evolving and becoming more and more demanding. Specialized software's and solutions are required to remove the functional barriers and improve organization and individual efficiency. Many corporations are still using the system that serve their standalone needs and have a hard time in communication and achievements. This means a lot of time is been spent on validating data, entering data into multiple systems and gathering data from many different sources. However, time spent on these kinds of mundane tasks could be spent on serving your company's customer or clients. Technology integration in business services give the ability to consolidate the diverse data and information sources both within and outside your enterprise into a single coherent framework.

The Aegean Technologies Limited is one the best tech solution rendering companies in the world as we combine technology with innovation, creativity, and strategy to solve complex business problems and help you go beyond regular transactions and create memorable experiences.

About Us

We don't just solve problems we deliver solutions

Aegean Technologies Limited is the technology arm of Aegean Industries Limited. Aegean technologies Limited is an Information and Communications Technology (ICT) firm. Our core expertise is in software development (computer programming), design, installation/setup, networking, testing, maintenance, procurement and general I.C.T merchandise. Our services are specifically for you, to make your business/work more efficient hence we exist to provide better services to aid your business and life move smoothly. Our job experience cuts across private businesses, institutions (universities and high schools), hospitals, multinational organizations as well as government establishments and non-government organizations.

OUR VISION

To be the most trusted brand in problem solving and solution delivery worldwide.

OUR MISSION

To be passionate in all our solutions through our services. To our clients, we go beyond our words.

What We Do

Whether you need a brand, design, consultation, solution, or you are looking for a fresh and creative idea to implement, you will find the best result with our services.

Programming

With our team of creative, dedicated and experienced developers, we build robust and high-performance applications, designed and tested to deliver custom software solutions based on technology & industry-specific expertise

Cloud Computing

With our Remote IT infrastructural services, we give clients peace of mind by allowing them to delegate the responsibility for management of their IT infrastructure to Aegean

ICT Consulting

Our e-Learning technology provides a platform for people to learn anytime and anywhere which includes training and the delivery of just-in-time information and guidance from experts

Database Management

We provide top of the line Database and Data Warehouse Development Services. Our expertise are in MS-SQL Server, Oracle, MySQL and No SQL database.

State Revenue Dev.

We developed an effective platform and process to help any state in Nigeria boost its revenue by about 25%.

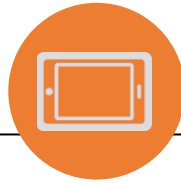

E-commerce Dev.

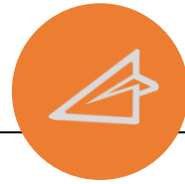

Design, development, integration, maintenance, and other services to drive e-cooperation with customers, partners, vendors, institution, and community members.

Reliable Development Tools
- Enterprise applications demand several integrations, which can only be carried out when the developing team is equipped with essential tools

Innovation-driven ecosystem - Having the right set of tools becomes pivotal for any development project so that meeting deadlines doesn't become a tasking process.

This is why scalability becomes vital when an enterprise is in a growing phase so that there is sufficient room available for future expansion measures

We offer cable system design, installation, and integration services over the spectrum of voice, data, electronic safety & security, and audio & video technologies, encompassing optical fiber, copper, and wireless based distribution systems.

Aegean's has built a reputation for professional installations with a common-sense and responsive approach to problem solving.

Quality Assurance is a set of activities to prevent non-conformance of a system to its requirements. It ensures that the built software product meets all the specified requirements of the customer.

Benefit of our service

- Improved security.
- Provides access to information from a centralized location.
- Improved efficiency.
- Increased flexibility and scalability.
- Offers competitive advantage.
- Offers exclusive solutions to business processes.
- Offers exclusive solutions to business processes.
- End-to-end product ownership, including backlog management.
- Overall product roadmap, priorities & strategy, SDLC.
- Acceptance criteria & acceptance process ownership.
- Support for governance framework — feedback and review.
- End-to-end quality & delivery ownership.
- Improved collaboration and workflow.
- Higher workforce efficiency.
